

Kamchatka

Far to the Far East of Russia there is a large peninsula. It is covered with glaciers and tundra geysers and smoking volcanoes, crystal clear rivers and beautiful forests. The name for this wonderful land is Kamchatka.

Kamchatka is a land of volcanoes are a part of the Pacific «Ring of Fire». There are about 160 dormant and 29 active volcanoes.

Kamchatka is also a land of hot and cold springs. About 150 hot springs in Kamchatka are medicinal springs.

The climate of Kamchatka is very diverse. Travelling through Kamchatka you can observe brown bear, moose, wolf, snow sheep, foxes and many other animals and birds in their native habitat.
